Since 1998, City Aquarium has been creating custom aquariums and installations that are works of art. City Aquarium has the distinction of working with interior and furniture designers, architects, sculptors, and marine biologists.

City Aquarium's aquaria and water pools are organic installations of water, light, space, and life. City Aquarium specializes in original, site-specific custom aquariums and installations that reflect the clients' imaginative choices. Other special projects include glass bottom pools, experimental water features, museum grade acrylic furniture, and other glass and acrylic fabrications.

About City Aquarium

The City Aquarium team has created residential, commercial, and artistic installations all over the world. Its diversity of client's include

New York's Majestic "Dream" Hotel, hedge fund developers, well-appointed residences, world-class museums, artists Tony Oursler and Ryan McGinness, and the Honda Corporation.

The City Aquarium distinction comes from its faith in utilizing the wealth of materials, aesthetic expressions, and artistic talents that exist throughout the world. City Aquarium does not provide "in-house," turnkey solutions that we believe limit our clients' choices.

Justin Muir, Principal Designer

Justin is the American designer whose signature vision elevates aquatic installations to a new aesthetic. For him, each project presents a new opportunity to collaborate with interior designers, sculptors, architects, reef makers, and even world-class installation artists. “I don’t consider myself solely as a custom aquarium company. I am a designer who is really excited about the art components within all water environments.” Personal attention and the willingness to go beyond the expected are characteristics that make Justin’s approach unique. Justin’s vision for City Aquarium began in the 1980s, when he was just a

teenager. Even before college, Justin was building his own tanks, fishing for lobsters and eels, as well as working with marine merchants. His studies in marine biology took him to exotic places such as Hawaii, the Dominican Republic, Haiti, Barbados, Jamaica, and the British Virgin Islands. Today, Justin designs, builds, and maintains unique water installations for clients all over the world.
